

CUSTOMER COMPLAINT NOTIFICATION

Aurora Biocare Ltd — Quality Assurance Department — Ref ABC/QA/2026/0412

Complaint Source	Distributor
Customer Name	Beacon Hospital Group Pharmacy
Contact	qa.pharmacy@beaconhospital.org / +44 20 7946 0733
Product Name	Cefuroxime Sodium for Injection
Strength / Grade	750 mg vial
Batch No	CFZ-6621-A
Mfg Date	14/03/2025
Expiry Date	13/03/2027
Quantity Affected	84 vials
Complaint Date	19/06/2026

NATURE OF COMPLAINT

Description: During reconstitution ahead of a scheduled theatre list, the ward pharmacist observed distinct grey-black particulate matter suspended in the reconstituted solution in six separate vials from this batch. The particles did not dissolve after two minutes of gentle agitation and remained visible against both light and dark backgrounds. Under a hand lens the particles appear fibrous rather than crystalline, which is inconsistent with undissolved active.

One patient received a partial dose from an affected vial before the pharmacist intervened. The patient developed a low-grade pyrexia within ninety minutes and was moved to the high dependency unit for observation as a precaution. No lasting harm has been reported at the time of writing, and the attending consultant has been informed of the suspected product defect.

All remaining 78 vials of this batch have been quarantined in a segregated cage under the control of the Chief Pharmacist. Photographs and two retained affected vials are available for collection. Given the sterile route of administration and the confirmed patient exposure, we consider this a critical defect and request an urgent response within 24 hours.

Reported by: Dr Ifeoma Nwosu, Chief Pharmacist, Beacon Hospital Group — escalated to Aurora Biocare QA on 19 June 2026.
