

FIELD ALERT - ADVERSE EVENT COMPLAINT

Received via Sales Representative - Priority Handling Requested

Complaint Source: Sales Representative
Customer Name: Lakeside General Hospital
Contact: dr.eze@lakesidegen.health
Complaint Date: 22/05/2026

PRODUCT DETAILS

Product Name: Ceftriaxone Sodium for Injection
Strength: 1 g vial
Batch No: CFX-3390-D
Mfg Date: 02/11/2025
Expiry Date: 01/11/2027
Quantity Affected: 18 vials

EVENT NARRATIVE

Description: Three patients on the surgical ward developed marked injection site inflammation and pyrexia within two hours of administration from vials of this batch. One patient, a 68-year-old male, deteriorated and was hospitalised in the high dependency unit for 48 hours with a suspected pyrogenic reaction. The attending consultant considers a product-related endotoxin issue plausible and has escalated internally.

On reconstitution, staff noted that the solution took noticeably longer to clear than usual and had a faint yellow tint not seen with previous batches. All remaining vials from this batch have been quarantined and retained under refrigeration for collection.

Reported by: Marcus Bell, Territory Manager (on behalf of Dr A. Eze)
